

Assignment 01

HTML5 & CSS3

Guidelines:

I. With pure CSS

1. The website should be responsive and built with semantic tags.
2. The logo should be designed with CSS (three downward triangles).
3. Entire website should be developed with css, no use of images except main background image which is provided.
4. For icons use “ElegantIcons” which are provided with attachment.
 - a. For quick reference of icons: [elegant-icon-font](#)
 - b. One approach of icon usage can be found in “elegant-font.css” file. For rest of the methods you can get idea from link mentioned in 4.a.
5. Mouse hover of the menu-item should be styled like the active menu item(i.e, Home).
6. The “mouse hover effect” for “learn more” buttons should match with rest of the website.
7. Mouse hover effect color for anchor tags should be one of the color from logo.

II. With *Bootstrap 3.x*

1. Same template with Bootstrap framework.
